

Ankita Mane

Associate Software Engineer
+91 9326038236 | ankitamane117@gmail.com

Summary

.NET Developer with 3+ years of experience designing, developing, and maintaining scalable web applications using ASP.NET MVC, ASP.NET Web API, and Microsoft SQL Server. Strong expertise in RESTful API development, Entity Framework, LINQ, performance optimization, N-Tier architecture, and secure application development.

Skills

- Languages & Frameworks: C#, ASP.NET MVC, ASP.NET Web API, .NET Framework 4.7.2, Entity Framework, LINQ
- Architecture & Concepts: N-Tier Architecture, OOP, SOLID Principles, Dependency Injection, Middleware
- Database: Microsoft SQL Server, MySQL, Stored Procedures, Indexing, Query Optimization, Pagination
- Integrations & Tools: iTextSharp, Twilio API, SendGrid, QRCoder
- Web Technologies: HTML, CSS, JavaScript, jQuery

Experience

Silicon Interfaces, Mumbai

Associate Software Engineer (April 2023 - Present)

- Designed and developed CRM modules using ASP.NET MVC and .NET Framework 4.7.2; built and maintained RESTful APIs for internal integrations.
- Integrated Microsoft SQL Server with optimized queries and indexing; implemented role-based authentication and authorization.
- Improved system performance by optimizing LINQ queries and reducing database round trips.
- Implemented automated email notifications and scheduled task reminders.
- Handled bug fixing, production issue support, and performance troubleshooting, following layered architecture for maintainability.

Projects

CRM – Customer Relationship Management System (crm.esiliconworld.com)

- Developed an end-to-end CRM platform for customer records, CSV bulk import, and communications, with modules for record creation, viewing, updating, and management.
- Designed the database schema and stored procedures; optimized queries and pagination to reduce data retrieval time.
- Implemented bulk email, greetings, record printing, and voucher generation; integrated PayPal and PayU gateways by country/payment option.
- Implemented validation, error handling, and secure data handling via authentication and authorization controls.
- Integrated **Twilio** to enable **customer calling and SMS messaging** directly through the CRM platform.

HRO – Human Resource / Recruitment Platform

- Developed an HRO/recruitment platform managing the end-to-end candidate recruitment process, including resume/CV scanning to extract candidate information.
- Integrated Webex for scheduling and conducting interviews, streamlining the workflow from resume screening to interview scheduling.

B2CIE – AI-Driven Education & Content Platform (b2cie.esiliconworld.com)

- Developed an AI-driven platform converting user-submitted content into structured synopsis format using OpenRouter AI models, with email verification for user authentication.
- Integrated WhatsApp API with number verification for automated message delivery; built an AI-based query handling system for storing/retrieving user questions.
- Developed online tests, class tests, and assessments to evaluate student performance, plus a dynamic question-paper generation module based on teacher-defined requirements.
- Designed automatic meeting/class scheduling and notifications, an assignment distribution system with submission tracking, and subscription payments for paid services.
- Enabled automated document generation and print-ready formatting for academic use.

Education

K.J. Somaiya Institute of Engineering and I.T, Mumbai — BE (Electronics and Telecommunication), June 2016 - July 2019

Training / Courses

- Participated in a National Level Project Competition at K.J. Somaiya Institute of Engineering and IT.
- Completed Full-Stack Development training at JSpiders (2022-2023).
